

DearAuditor QMS

Conformance Kit Validation Summary Report

Report Control

Report ID	VSR-KIT-2026-05-01-01
Kit Version	0.1.0
Run ID	QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY
Planned Run ID	VVR-KIT-2026-03-18-01
Execution Mode	live
Report Date	2026-05-01
Generated UTC	2026-05-01T12:55:07.919Z

Target QMS Repository

Repository	AliakseiT/dearauditor-qms-baseline
Origin URL	https://github.com/AliakseiT/dearauditor-qms-baseline.git
QMS URL	https://sign.qms.dearauditor.ch
Checkout Source	github
Declared Ref / Tag	QMS-2026-04-09-R002
Resolved HEAD	fc7b66eb4818a05e908764e36d0f2a293a112f93
Exact Tags on HEAD	QMS-2026-04-09-R002, sig-pr330-hc2de3ee6b44f-r01
Default Branch	main
Current Branch	unknown
Visibility	public

Traceability Scope

Validation Scope	DearAuditor reference QMS baseline control-system validation
Scope Boundary	Company-specific QMS validation must be repeated or adopted downstream with local configuration, users, roles, secrets, intended use, and record scope verified there.
Requirements Covered	SYS-REQ-001, SYS-REQ-004, SYS-REQ-005, SYS-REQ-006, SYS-REQ-002, SYS-REQ-003
Risks Covered	RISK-003, RISK-004, RISK-001, RISK-002
Evidence Package Items	16
Validation Basis	records/verification_validation/runs/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY/vv_validation_basis.md

Outcome Summary

Passed	6
Failed	0
Blocked	0
Not Run	0
Recommendation	ready_for_formal_release

Test Results and Observed Evidence

TC-KIT-0001 | PASS | Controlled upstream-baseline and review-path verification

Controlled GitHub-native QMS surface and review-path prerequisites are consistent for the target profile.

- Evidence: records/verification_validation/runs/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY/execution_evidence/TC-KIT-0001/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY.md

```
{

    "repository_metadata_available": true
  }
}
```

TC-KIT-0002 | PASS | Signature flow identity and request-context verification

Target-generated signature ceremony was discovered and browser evidence was captured when requested.

- Evidence: records/verification_validation/runs/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY/execution_evidence/TC-KIT-0002/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY.md

TC-KIT-0003 | PASS | Immutable record-publication package verification

Immutable V&V publication path was exercised for the live probe campaign and a V&V release is present in the target repository.

- Evidence: records/verification_validation/runs/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY/execution_evidence/TC-KIT-0003/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY.md

TC-KIT-0101 | PASS | End-to-end intended-use validation scenario

End-to-end intended-use validation was exercised by the controlled live probe PR, which was merged and signed in the target repository.

- Evidence: records/verification_validation/runs/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY/execution_evidence/TC-KIT-0101/QMS-2026-04-09-R002__VVR-KIT-2026-03-18-01__LIVE-PROBE-VERIFY.md

```

Signature Control Mapping

- Signer identity, signature meaning, timestamp, PR linkage, target hash binding, attestation retention, immutable release publication, and record retrieval are mapped in vv_report.md.
- Company-specific user authorization, role assignment, access review, and repository settings remain downstream/adopter validation responsibilities unless the target repository is the adopted company QMS.

Negative / Edge-Case Coverage

- This live probe primarily demonstrates the governed happy path for the reference baseline workflow.
- Unauthorized signer, wrong-link, expired PIN, missing approval, missing signature, tampered artifact, retention/export, and platform access-control challenge cases are tracked as follow-up platform validation items unless linked evidence is present in the target package.

Reviewer Notes

This report is a human-readable summary of the controlled evidence bundle. The evidence manifest and SHA256 hashes are the authoritative integrity controls for the generated records. Browser screenshots or ceremony captures are expected only for live execution modes that exercise UI-mediated signature or publication workflows.
